PREMIUM ANALYSIS

3. Floor-Rise Dynamics & Rate-Card Examination

Empirical evaluation of actual recorded floor-rise differentials across 1,450 sq ft luxury units.

Identical Rate-Card Registrations Across Vertical Levels

Unit No.	Tower	Floor Level	Registration Date	Agreement Value	Recorded Floor Rise Impact
Unit 802	Tower Alpha	8th Floor	12 Aug	**₹2,17,50,000**	Base Benchmark
Unit 1102	Tower Alpha	11th Floor	12 Aug	**₹2,17,50,000**	₹0.00 Floor Premium
Unit 1402	Tower Beta	14th Floor	04 Sep	**₹2,17,50,000**	₹0.00 Floor Premium
Unit 1704	Tower Beta	17th Floor	28 Jun	₹2,24,50,000	Clustered High Tier
Unit 2104	Tower Alpha	21st Floor	19 Sep	₹2,24,50,000	Identical to 17th Floor

FLOORS 6 TO 14 AVERAGE

₹15,000 /sq ft

Demonstrates stable agreement pricing across mid-tier floor bands in both residential towers.

FLOORS 15 TO 22 AVERAGE

₹15,483 /sq ft

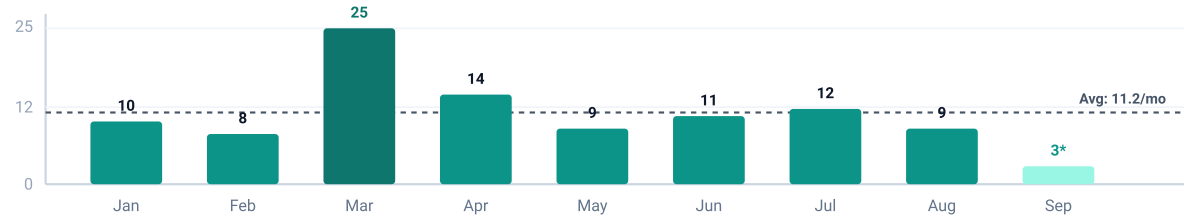

High-floor spread is limited to just **+₹483/sq ft total**, debunking mandatory steep per-floor charges.

Commercial Negotiation Takeaway: Developer marketing presentations typically state a mandatory floor-rise surcharge of ₹60–₹80 per sq ft per level. However, actual registered agreements prove that units across Floors 8, 11, and 14 registered at the exact identical agreement figure of **₹2,17,50,000**. Upper levels (17th vs 21st) also show flat pricing, providing buyers with factual justification to contest arbitrary floor premiums.

ABSORPTION DYNAMICS

4. Monthly Absorption Velocity & Developer Momentum

Monthly registration counts across Phase 1. Trailing monthly average: 11.2 units across both towers.

Absorption Trend Analysis

A total of **101 cumulative registrations** were documented across the project calendar. The absorption curve highlights clear commercial stages:

- **Inaugural Launch Velocity (Q1):** Spiked at 25 registrations in March driven by financial year-end booking incentives.
- **Consolidation Plateau (May–Aug):** Normalized to an average of 10 to 12 monthly registrations following the price step.
- **Current Run-Rate (Q3):** Pacing at 9 units in August with initial September filings opening steadily, reflecting standard inventory absorption.

> **Commercial Positioning Assessment:** With sales velocity settling into an average run-rate of ~10 units monthly, sales leadership faces routine month-end absorption targets. Prospective buyers negotiating toward the final week of a calendar month maintain higher flexibility on package inclusions and covered parking allocations.
